EDUCATION

BACHELOR OF COMPUTER SCIENCE

Technical University of Moldova

Sept 2023 - June 2027 (expected)

English Taught Honours Program in Software Engineering

WORK EXPERIENCE

FRONT END DEVELOPER INTERN

Globant, Chişinău

1 Sept - 26 Sept 2025

- Worked on developing the frontend for a secure book-sharing web application using React and Tailwind CSS, implementing user authentication, personal libraries, and friend-based trading features to improve resource sharing and reduce book overbuying.

FRONT END DEVELOPER INTERN

Globant, Chişinău

3 Sept - 26 Sept 2024

- Developed the frontend for a website - Fixer.md, that connects property owners with reliable service providers to handle home maintenance tasks efficiently.
-

PROJECTS

BORROW BOOK

- Designed and built in a team of 5 a book-sharing platform enabling users to share personal libraries and request trades to make reading more accessible and collaborative.
- I worked on developing the frontend in React with responsive design in Tailwind CSS and prototyped the website design in Figma.
- Used Git/GitHub for version control and collaborative development.
- Worked in a Scrum/Agile team of 5, using Jira to manage sprints, tasks, and communication.

FIXER.MD

- The project solves the problem of property owners by helping them find suitable and trustworthy service providers and the problem of maintenance workers by giving them access to a large pool of homeowners seeking their service.
- I worked on the front end, using React, HTML, JS and CSS.
- Collaborated with a team of 5 using Git/GitHub for version control and Jira for Agile sprint management.

REACT COURSE PROJECTS

- Built several small projects during a React course to practice core functionalities such as state management, props, routing, forms, gaining practical experience with component-based development.

ACHIEVEMENTS

1ST PLACE SUMMER FAF X SIGMOID HACKATHON 2025 (JUNE 21-22)

- Participated in the Summer FAF x Sigmoid Hackathon and co-developed LEARNMAXXING, a web platform that transforms study materials into AI-generated flashcards and adaptive exams. Contributed as a frontend developer, building the interface in React with Tailwind CSS. Our team won **first place**.

TECHNICAL SKILLS

FRONTEND

- React
- JavaScript
- HTML
- CSS
- Tailwind CSS

DESIGN

Figma

COLLABORATION

- Git/Github
- Agile/Scrum
- Jira

OTHER

- Basic Node.js,
- HTTP/REST APIs
- Docker
